*The workshop on The Cosmology of Extra  
Dimensions and Varying Fundamental Constants,  
which was part of JENAM 2002, was held at the  
Physics Department of the University of Porto  
(FCUP) from the 3rd to the 5th of September  
2002. It was regularly attended by about 110  
participants, of which 65 were officially registered  
in the VFC workshop, while the others came from  
the rest of the JENAM workshops. There were also  
a few science correspondents from the national*

*and international press. During the 3 days of the scientific programme, 8 Invited Reviews and 30 Oral Communications were presented. The speakers came from 11 different European countries, and also from Argentina, Australia, Canada, Japan and the U.S.A. There were also speakers from six Portuguese research institutions, and nine of the speakers were Ph.D. students. The contributions are presented in these proceedings in chronological order. The workshop brought together string theorists, particle physicists, theoretical and observational cosmologists, relativists and observational astrophysicists. It was generally agreed that this inter-disciplinarity was the greatest strength of the workshop, since it provided people coming into this very recent topic from the various different backgrounds with an opportunity to understand each other's language and thereby gain a more solid understanding of the overall picture. Includes glosses of the Welsh language, bardic vocabulary, etc. Automotive Air-conditioning and Climate Control Systems is a complete text and reference on the theoretical, practical and legislative aspects of vehicle climate control systems for automotive engineering students and service professionals. It*

*provides the reader with a thorough up-to-date knowledge of current A/C systems, refrigerants and the new possible replacement systems like CO2, and includes unrivalled coverage of electronic and electrical control. Filling the gap in the automotive engineering and servicing market for students and those training on the job, this book will help both newcomers and those with more experience of air-conditioning systems maintenance engineering to keep up with the latest developments and legislation. Detailed coverage of European and US vehicle HVAC systems Thorough explanation of current and future systems including CO2 Meets relevant C&G, IMI, and HND vocational and professional qualifications IMI recommended reading material Includes practical cases studies and examples from design and manufacturing companies including Ford, Vauxhall, Toyota, VW, Visteon, Sanden and others, accompanied by over 300 detailed illustrations and photographs This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history. Taken together, the various chapters in the volume provide a rich*

*and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice. «Depuis longtemps, je ruminais l'idée de publier un livre à propos de l'UPAC. Puisque j'y ai travaillé et que j'ai été visé par le Projet A, j'ai plutôt décidé d'écrire à propos des gens qui ont dénoncé les mauvaises pratiques au sein de l'UPAC. Je savais que ce serait difficile, rien ne pouvait me laisser croire que concrétiser cette ambition allait s'avérer un si grand défi. J'étais une victime encore traumatisée par les actions de l'UPAC, j'ai eu besoin de temps et de la latitude nécessaire pour démystifier cette mascarade orchestrée, vulgariser et rendre publique cette enquête*

*bidon. En voilà le résultat.» Electrical Shock Safety Criteria documents the proceedings of the First International Symposium on Electrical Shock Safety Criteria, held in Toronto, Canada, 7-9 September 1983. The objective was to establish the state of the art in the field of electrical shock safety criteria as applied to electrical power utilities. The symposium brought together leading experts from electrical utilities, universities, and research laboratories from around the world, interested in problems associated with electrical shock and safety. The proceedings are organized in three sections, each consisting of the morning review papers and afternoon panel discussions. Section 1 presents an in-depth analysis of the physiology of electrical shocks including such topics as body-weight scaling, electrocution equation, physiological effects of electrical current, and factors affecting fibrillation threshold. Section 2 focuses on the analysis of body impedance under various conditions and the techniques for measuring current distribution in the body. Section 3 is devoted to discussions of safety criteria and related standards from the point of view of current practices in electrical utilities. The Apple Macintosh Encyclopedia provides easily accessible, brief and*

*understandable information on the topics that you are most likely to have questions about. We have carefully digested the manuals, books, magazine articles, and other information sources for the Macintosh. These, combined with our own experience in using the Macintosh and other personal computers, have been integrated into an alphabetical sequence of short entries in the style of an encyclopedia. The goal is to provide concise, useful and easy-to-understand information on a particular topic that is quickly accessible when you need it. Much of the information in the entries is not contained in the manuals provided with the Macintosh and various software products. For example, notice the discussion, under WIDTH, of the "deferred" nature of this command when used with a device name, the discussion of the colon (:) in Multiplan for ranges, or Saving, Problems With. These topics are omitted or inadequately covered in the standard manuals. The Macintosh is the first truly visual computer. In keeping with the highly visual nature of using the Macintosh, we have provided over 100 illustrations. Each shows exactly what you will see on the screen when exploring topics discussed in the text. The Macintosh Encyclopedia opens with a visual guide to icons,*

*and remains highly visual in orientation throughout the text. "Monthly index of surgery and gynecology" in vol. 9- . Man U efallai ydy clwb pel-droed enwoca'r byd ac mae miloedd o gefnogwyr yn byw yng Nghymru. This "ambitious [and] delightful" (The New York Times) work of literary nonfiction interweaves the science and history of the powerful refrigerant (and dangerous greenhouse gas) Freon with a haunting meditation on how to live meaningfully and morally in a rapidly heating world. In After Cooling, Eric Dean Wilson braids together air-conditioning history, climate science, road trips, and philosophy to tell the story of the birth, life, and afterlife of Freon, the refrigerant that ripped a hole larger than the continental United States in the ozone layer. As he traces the refrigerant's life span from its invention in the 1920s—when it was hailed as a miracle of scientific progress—to efforts in the 1980s to ban the chemical (and the resulting political backlash), Wilson finds himself on a journey through the American heartland, trailing a man who buys up old tanks of Freon stockpiled in attics and basements to destroy what remains of the chemical before it can do further harm. Wilson is at heart an essayist, looking far and wide to tease out what particular*

*forces in American culture—in capitalism, in systemic racism, in our values—combined to lead us into the Freon crisis and then out.*

*“Meticulously researched and engagingly written” (Amitav Ghosh), this “knockout debut” (New York Journal of Books) offers a rare glimpse of environmental hope, suggesting that maybe the vast and terrifying problem of global warming is not beyond our grasp to face. Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.*
