Better Than Carrots or Sticks Nov 30 2020 Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In *Better Than Carrots or Sticks*, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in

which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to * Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills; * Develop a nonconfrontational rapport with even the most challenging students; and * Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.

Middle School Matters Jan 25 2023 "Middle school is its own important, distinct territory, and yet it's either written off as an uncomfortable rite of passage or lumped in with other developmental phases. Based on her many years working in schools, professional counselor Phyllis Fagell sees these years instead as a critical stage that parents can't afford to ignore (and though "middle school" includes different grades in various regions, Fagell maintains that the ages make more of a difference than the setting). Though the transition from childhood to adolescence can be tough for kids, this time of rapid physical, intellectual, moral, social, and emotional change is a unique

opportunity to proactively build character and confidence. Fagell helps parents use the middle school years as a low-stakes training ground to teach kids the key skills they'll need to thrive now and in the future, including making good friend choices, negotiating conflict, regulating their own emotions, be their own advocates, and more. To answer parents' most common questions and struggles with middle school-aged children, Fagell combines her professional and personal expertise with stories and advice from prominent psychologists, doctors, parents, educators, school professionals, and middle schoolers themselves"--

There are twenty-three other kids who live on the island because their dads work as guards or cooks or doctors or electricians for the prison, like my dad does. And then there are a ton of murderers, rapists, hit men, con men, stickup men, embezzlers, connivers, burglars, kidnappers and maybe even an innocent man or two, though I doubt it. The convicts we have are the kind other prisons don't want. I never knew prisons could be picky, but I guess they can. You get to Alcatraz by being the worst of the worst. Unless you're me. ARTistic Pursuits, Middle School 6-8, Book One Jan 13 2022 This book provides students with an in-depth look at the elements of art and composition in a simply written text designed to engage students in the creative process as they produce original artworks. The organized content and conversational tone is perfectly suited to the age level and is equally engaging for both the novice and the more experienced art student. The middle school student can begin this book without prior knowledge of art and work independently without the need for parental instruction. The unique feature of the book is the way students learn from its pages, then choose a subject from their own environment, and easily apply the new information to their own art. Students think creatively as they are introduced to topics such as line, shape, value, symmetry, perspective, and proportion. Each unit is crafted for focus on one element of art while exploring the topic in four unique ways. Students explore their world in an engaging study designed to strengthen observation skills. In the art appreciation and history lesson, students learn how each element is used in a Master artwork. They

gain insight about the artist, how the goals of a culture affect the look of the artwork, and discover contrasts between Eastern and Western art. Instruction in graded pencil drawing and ink utilizes the knowledge gained through the study of art from countries around the world including Japan, China, Europe, India, Australia and more. Technique and application pages allow skills to develop naturally as students work independently. Four special assignments show how artists combine elements of art and broaden the student's experiences with art materials. The book provides lessons for the completion of sixty-eight finished drawings in pencil and ink that are both original and entirely the student's own. "(My daughter) has been tackling the book solo. She raves about the presentation, and has already begun to improve...In addition; I see her enjoying art more." Homeschool Parent - Heather Schwarzen / Washington
