The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. In today's society, everything is in question. The reflexive questioning of modernity has fundamentally problematized society, including philosophy, which has experienced a crisis of metaphysics. Michel Meyer's problematology answers this crisis by questioning questioning, unfolding a new way of doing philosophy, with special relevance for the study of society. In this first-ever extended treatment of Meyer's work, Nick Turnbull examines the main features of problematology, including the principle of questioning and the deduction of an original conception of difference, based on the question-answer relationship. Turnbull shows how these concepts produce new perspectives in the philosophy of the emotions, history, meaning, politics, rhetoric and science. He applies Meyer's ideas to key questions in the philosophy of social science, showing how problematology offers important insights for understanding contemporary society. The book compares problematology with the work of well-known thinkers, including Bourdieu, Castoriadis,

Collingwood, Derrida, Dewey, Gadamer, Heidegger and Lyotard. Turnbull uses problematology and rhetoric to explain how meaning is constructed through practice in the negotiation of social distance. Eranthi Samarakoon understands the difficulties faced by students ever since the single best answer (SBA) questions were introduced in medical curricula in many countries around the world. She realises that the successful preparation for a professional examination requires understanding the style of the questions asked and the process of the examination. With these goals in mind, she has produced this set of two books containing a large number of questions in obstetrics (214) and gynaecology (214) to help the students in facing the examination with confidence. A pioneering study of ancient and medieval Christology. Employing a range of interdisciplinary methods, Stephen J. Davis shows how Christian identity in Egypt was shaped by a set of replicable 'christological practices'. He thus enables readers to trace the Coptic church's theological and cultural transition from late antiquity to Dar al-Islam. 22 Developed for the AQA Specification, revised for the new National Curriculum and the new GCSE specifications. The Teacher File contains detailed support and guidance on advanced planning, points of emphasis, key words, notes for the non-specialist, useful supplementary ideas and homework sheets.
